

## **Tips.**

*Safety for your property & Waste Management driver:*

- » Maintain clear and safe access to containers
- » Make sure containers are in an open or well lit area
- » Overhead clearance must be a minimum of 14 feet

*Avoiding delay of service:*

- » Ensure no vehicles are parked in front or on sides of containers
- » Please have gates or access to containers unlocked for service

*Keeping a clean area:*

- » To avoid spillage, container lids and side doors should be closed
- » If you have additional volumes of waste, please keep them clear of the service area

## **The following items are NOT allowed in general waste containers.**

- |                                       |  |
|---------------------------------------|--|
| » Appliances                          | » Flammables                           |
| » Batteries (Auto and Small Device)   | » Herbicides/Pesticides                |
| » Electronics                         | » Needles                              |
| » Hazardous Waste                     | » Tires                                |
| » Medical Waste                       | » Bodily Semi Solids and Bodily Fluids |
| » Radioactive Materials               | » Construction Debris                  |

| » Asbestos                            | » Liquids                              |
| » Chemical Products                   | » Paint and Thinners                   |
|                                       | » Yard Waste                           |

## **Holiday Schedules.**

*Waste Management observes the following holidays:*

- » New Year's Day
- » Thanksgiving Day
- » Christmas Day

*If your scheduled collection service falls on the listed observed holiday, service will resume on your next scheduled service day.*
